Ford MEDG9.8.1 Wiring

Connection with MPC5XX Module

Attention

You cannot use OBD Flash files to write into the ECU

You need to open MEDG9.8.1 cover in boot mode. Please connect as described below
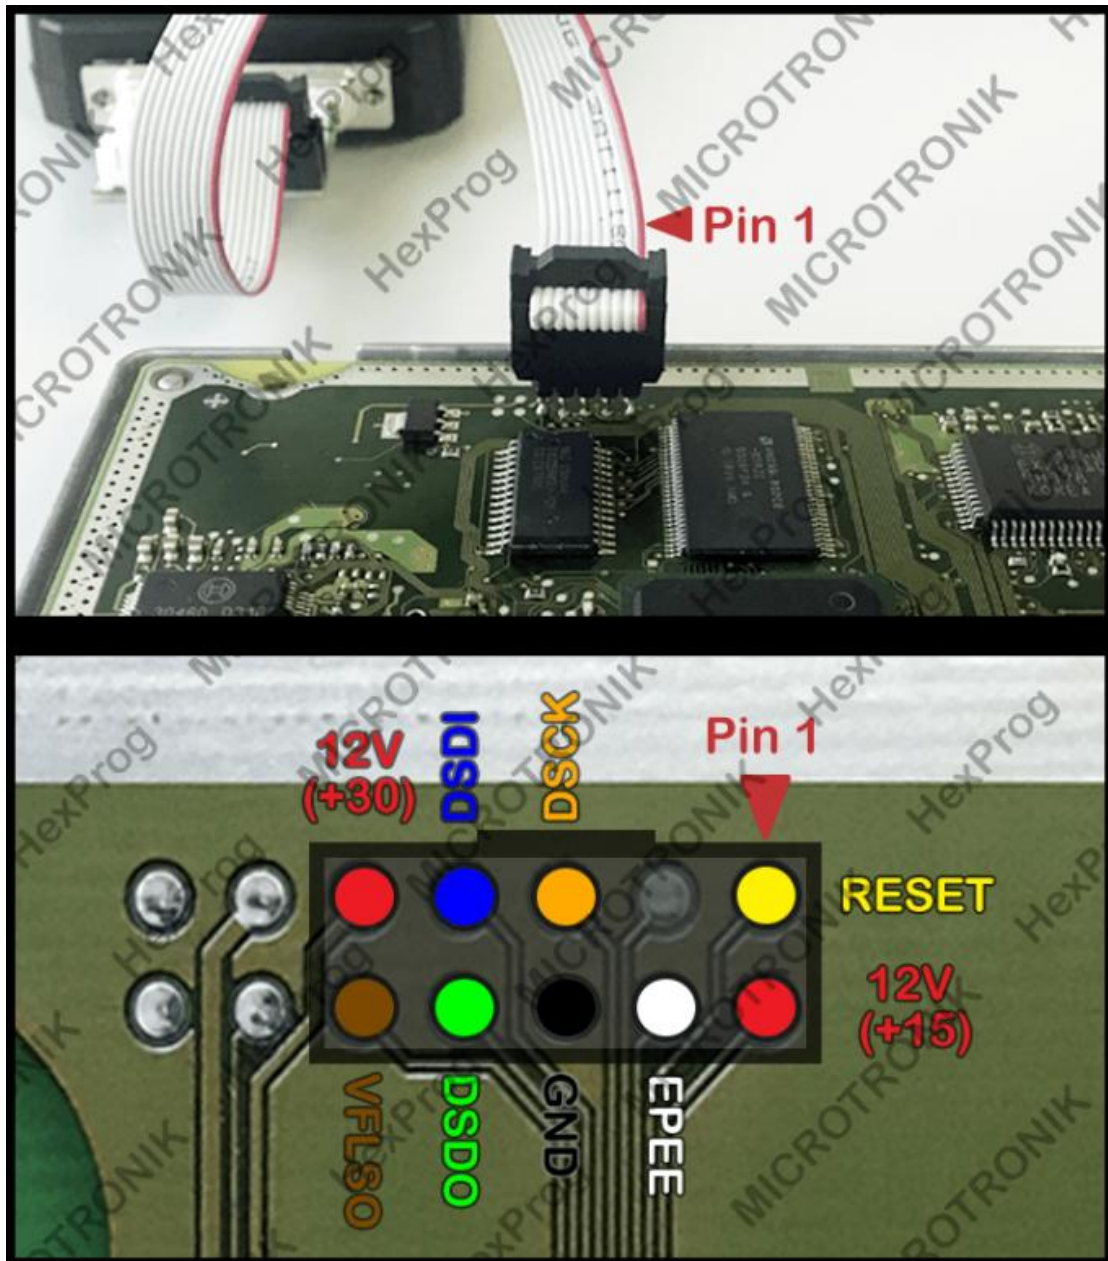

Note

You can use any **General BDM Frame**. HexProg MPC5XX module is compatible with these frames

Internal Wiring

Connect HexProg signals wires to MEDG9.8.1 board as shown below

Ford-MEDG9.8.1-Boot-Location
